Tel: 2719444 Fax: 65-2785319
Telex: HPSG RS 21486

Congratulations!

You have just entered the world of fiber optics. To make your evaluation process as easy as possible, we have assembled a kit which features Hewlett Packard's low cost fiber optics transmitter and receiver components. Your HFBR-0410 kit contains the following items:-

- o One HFBR-1412 Transmitter
- o One HFBR-2412 Five Megabaud TTL Receiver
- o Three Metres of ST Connectorized 62.5/125um Fiber Optic Cable
- o HFBR-0400 ST series T/R Data Sheets
- o AT&T's Lightguide Apparatus Data Sheets

With our unique optical port design, the HFBR-1412 Transmitter and HFBR-2412 Digital Receiver provide guaranteed performance with five different glass core fiber sizes, at distances up to 2.5 kilometres, and data rates up to 5 megabaud.

To evaluate the ST components in this kit, we recommend using the simple five megabaud circuit shown on page 13 of the HFBR-0400 ST series data sheets.

Hewlett-Packard offers a wide range of reliable, low cost, fiber optic components. In addition, we have a large group of application engineers who are ready to help you design with fiber optics.

We, at Hewlett-Packard, appreciate your business, and are ready to help you implement a low cost, fiber optic solution. For more detailed application information, or component pricing, please contact your local Hewlett-Packard Components Sales engineer or authorized Hewlett-Packard distributor.

For more information of AT&T's ST series connectors and cable, please refer to the telephone numbers on the Lightguide Apparatus data sheets.

Sincerely,

The Hewlett-Packard Company

*ST is a registered trademark of AT&T Lightguide Cable Connectors.
